

Becas que ofrecen conjuntamente **CONACyT** y la **Universidad de Toronto**

Para: **estudiantes mexicanos** que quieren hacer el doctorado en Canadá (Toronto)

Programa de 5 años. Se puede empezar desde 2018 hasta 2022.

Award Overview

Student Deadline to CONACYT:	June 15, 2018
Value/Duration:	Tuition, living stipend, cost of UHIP for 4 years (see below for details)
Level of Study:	PhD
Required Legal Status:	International (Mexican citizens)
Results:	Summer 2018 by agency

Purpose

The National Council for Science and Technology/The Consejo Nacional de Ciencia y Tecnologia (CONACYT) is an organization funded by the Mexican government that has been encouraging the development of professionals of the highest quality for more than 30 years.

The University of Toronto and the Government of the United Mexican States' National Council of Science and Technology (CONACYT) have renewed their partnership by signing an agreement to support up to **150 scholarships over the period of the 5-year agreement for Mexican students** who have already completed a master's degree to pursue **doctoral education at the University of Toronto**.

Value and Duration

CONACYT: will provide successful PhD applicants funding towards the cost of tuition (equivalent to the program's domestic tuition rate to a maximum of \$21,000 CAD/Yr), health insurance (generally up to 715 USD/Yr.), and living expenses (generally up to 13,200 USD/Yr.) for 4 years.

U of T: Financial obligations for graduate units/supervisors accepting CONACYT scholarship recipients under this agreement will be contingent on existing departmental funding guidelines, i.e. units will cover any

differential in funding between the CONACYT Scholarship and that of the normal funding package provided to international students.

Eligibility to Apply

In order to qualify for a CONACYT doctoral scholarship, applicants must be Mexican citizens.

PhD degree program **applicants must also meet all of the U of T's requirements for admission to a doctoral program**. Typically, this entails the prior completion of a **degree** equivalent to a U of T **Master's** for a PhD program, as well as meeting the **minimum academic and English language requirements**. In order to apply for the CONACYT – UToronto Program scholarship, **applicants must already have received an offer of admission from the University of Toronto**. The following cohorts (by admission period) are eligible for funding under this program: **Fall 2018, 2019, 2020, 2021, 2022**.

While applicants from all disciplines are welcome, CONACYT has identified the following fields of study as priority areas for CONACYT scholarship funding:

- **Biotechnology and Agricultural Sciences;**
- **Biology and chemistry;**
- **Medicine and health;**
- Energy;
- Environment;
- Earth Sciences;
- Industrial manufacturing technologies;
- Materials;
- Nanotechnology;
- Information technology and telecommunications;
- Applied mathematics and modeling.

Application Process

Step 1: Applicants to the University of Toronto must first apply [for admission](#) to a PhD program in order to **obtain an official offer of admission letter before the CONACYT submission** deadline. **IMPORTANT:** Applicants should indicate on the SGS Online Admissions Application that they have or will be applying for the "CONACYT – UToronto Program". In addition, applicants should notify their proposed graduate unit, and potential supervisor that they intend to apply for a CONACYT scholarship and any associated deadlines.

Step 2: A separate **CONACYT application** must be created between **April and June 15, 2018** as per instructions on the [CONACYT website](#). Once applicants receive the appropriate official U of T offer of admission letter (which may specifically reference the conditional CONACYT funding), they may then use this letter to finalize their CONACYT scholarship application and submit it before the CONACYT deadline.

Para solicitar a la Universidad de Toronto, al departamento de Bioquímica y ver fechas límite de solicitud, consultar las siguientes ligas: La fecha más próxima posible es **ENERO DE 2019**
